

Cake Pop Bags

Clear Polypropylene — Bulk & Retail Packs · Revision date: 3rd June 2026

MATERIAL

30 micron food-grade polypropylene (PP)

CONSTRUCTION

Side-weld seams, crystal-clear finish

SIZE RANGE

3 stocked sizes, 76 mm to 102 mm wide

PACKAGING

Retail packs of 50 & bulk boxes

1 Product Overview

- Yolli cake pop bags are food-grade polypropylene side-weld bags — the same crystal-clear film as our wider clear cello bag range, offered in the three most popular sizes for cake pops, chocolate lollipops and small treats.
- The high-clarity 30 micron film shows off decorated cake pops and lollipops while protecting them from dust and handling. The bag width is always the open side, so the stick sits through the open end and is tied off below the treat.
- Bags are supplied in retail packs of 50 or bulk boxes. Close with a twist tie, ribbon or heat seal. Custom sizes can be produced for trade customers with volume requirements.

2 A Note on the Name

Although often called cello or cellophane bags, these are made from food-grade polypropylene, not cellophane. "Cello" is the industry name for clear display bags of this type. Polypropylene is clearer, stronger and more heat-sealable than true cellophane.

3 Technical Characteristics

Property	Specification
Material	30 micron food-grade polypropylene (PP).
Finish	Crystal-clear with a smooth surface.
Construction	Side-weld seams.
Orientation	Width is always the open side.
Sealability	Heat-sealable with impulse or bar sealers; also closes with twist ties or ribbon.
Food contact	Food-grade film suitable for direct food contact.
Packaging	Retail packs of 50 bags, or bulk boxes for trade and commercial volumes.
Size range	3 stocked sizes, from 76 mm × 127 mm up to 102 mm × 152 mm.
Manufacture	Made in Britain — UK manufacturing for quality assurance.
Wider range	Part of the Yolli clear cello bag range. See the Clear Cello Bags sheet for the full 27-size range and bespoke options.

4 Size Range

The three stocked cake pop sizes are listed below. Retail packs contain 50 bags; bulk box quantities vary by size as shown. The first dimension is the bag width (the open side); the second is the height.

Size (inches)	Size (mm, W × L)	Retail SKU	Bulk SKU	Bulk box qty
3" × 5"	76 × 127	RSW007A · 50 pk	SW006	6,000
3.5" × 5"	89 × 127	RSW008A · 50 pk	SW007	6,000
4" × 6"	102 × 152	RSW011A · 50 pk	SW010	3,000

Note: Bulk box quantities are nominal pack counts. The 3" × 5" and 3.5" × 5" sizes suit standard cake pops and lollipops; the 4" × 6" size gives extra room for larger pops, twist ties and ribbon. Sizes outside this range are available through the wider clear cello bag range or as a custom order.

5 Closing & Sealing Options

Method	Detail
Twist ties & ribbon	The usual finish for cake pops — gather the bag around the stick below the treat and secure with a twist tie, ribbon or satin bow for a neat presentation.
Heat sealing	Compatible with impulse and continuous band / bar sealers for a secure, tamper-evident finish at volume.
Self-seal strip	An adhesive self-seal strip can be added across the clear cello bag range by request. It must be specified by email before ordering, as it is not applied as standard.

6 Typical Applications

- Cake pops and chocolate lollipops
- Marshmallow pops and brownie pops
- Decorated biscuits and cookie pops
- Sweets, fudge and small confectionery
- Wedding favours and party bags
- Small gifts and promotional treats

7 Custom & Bespoke Supply

Bag sizes outside the three stocked cake pop sizes are available through the wider Yolli clear cello bag range, or as a bespoke size for trade customers with volume requirements. Custom-printed bags are available on the same food-grade polypropylene film, with logos, ingredients and barcodes printed directly onto the bag.

Custom production is subject to minimum order quantities, lead times and confirmation at the time of enquiry.

8 Supporting Compliance Documentation

A manufacturer's Statement of Compliance for the food-grade polypropylene film used in these bags is held on file and available to trade customers on request. Supplier-identifying details have been redacted. It confirms the following for the materials used in food-contact packaging:

- **Manufactured to a food-packaging standard.** The film is manufactured under the requirements of the BRC/IoP Global Standard for companies manufacturing and supplying food packaging, and is suitable for direct food contact.
- **Compliant with the EU & UK food-contact framework.** Confirmed against Regulation (EC) No 1935/2004 (materials in contact with food), Regulation (EU) No 10/2011 on plastics (inclusive of successive amendments and applicable transition periods), Regulation (EC) No 2023/2006 (good manufacturing practice) and the Materials and Articles in Contact with Food (England) Regulations 2012.
- **Packaging-waste & heavy metals.** Compliant with European Directive 94/62/EC on packaging and packaging waste; materials are checked annually for heavy metals under the Packaging (Essential Requirements) Regulations 1998 (No. 1165) and subsequent amendments.
- **Declaration of absence.** Certified as not intentionally containing Bisphenol A (BPA). No post-consumer or recycled materials are used in the film.
- **Migration testing.** When tested with olive oil and de-ionised water for 10 days at 40 °C, overall migration was within the limits laid down by EU legislation.
- **Yolli BRCGS Agents & Brokers.** Yolli additionally holds BRCGS Agents and Brokers certification covering food-contact packaging materials, and provides VAT invoices with all business orders.

Note: Statement of Compliance dated January 2024, with an updated revision on file reflecting the latest EU plastics amendments. Supplier name, contact details and certificate reference numbers have been redacted from this summary. Original certificates and declarations can be issued to trade customers on request — confirm exact certification references before relying on them for due-diligence files.

9 Warnings

- Plastic bags can present a suffocation hazard. Keep away from babies and children.
- Not suitable for oven, microwave or boil-in-bag use unless separately confirmed for the finished application.
- Store away from direct heat and naked flames.

RELATED YOLLI PACKAGING

These bags are part of Yolli's clear cello bag range, on the same food-grade polypropylene film. For the full size range see [Clear Cello Bags](#) (27 stocked sizes), or order fully branded film as [Custom Printed Cello Bags](#).
