

Toffee Apple Bags

Clear Polypropylene · 133 mm × 203 mm — Bulk & Retail Packs · Revision date: 3rd June 2026

MATERIAL

30 micron food-grade polypropylene (PP)

CONSTRUCTION

Side-weld seams, crystal-clear finish

SIZE

133 × 203 mm (5.25" × 8") — one stocked size

PACKAGING

Retail pack of 50 & bulk box of 4,000

1 Product Overview

- Yolli toffee apple bags are food-grade polypropylene side-weld bags — the same crystal-clear film as our wider clear cello bag range, supplied in the single popular 133 × 203 mm size that fits all standard toffee and chocolate apples.
- The high-clarity 30 micron film shows off the glossy finished apple while protecting it from dust and handling. The bag width is the open side: slip the bag over the apple, gather it around the stick and finish with a twist tie, ribbon or heat seal.
- Bags are supplied in retail packs of 50 or bulk boxes of 4,000 for stalls, fairs and trade production. The same film is offered across a full range of sizes, and custom sizes can be produced for trade customers with volume requirements.

2 A Note on the Name

Although often called cello or cellophane bags, these are made from food-grade polypropylene, not cellophane. "Cello" is the industry name for clear display bags of this type. Polypropylene is clearer, stronger and more heat-sealable than true cellophane.

3 Technical Characteristics

Property	Specification
Material	30 micron food-grade polypropylene (PP).
Finish	Crystal-clear with a smooth, glossy surface.
Construction	Side-weld seams.
Size	133 mm × 203 mm (5.25" × 8"). Width is the open side.
Fit	Designed to fit all standard toffee and chocolate apple sizes.
Sealability	Heat-sealable with impulse or bar sealers; also closes with a twist tie or ribbon.
Food contact	Food-grade film suitable for direct food contact.
Packaging	Retail packs of 50 bags, or bulk boxes of 4,000 for trade and commercial volumes.
Manufacture	Made in Britain — UK manufacturing for quality assurance.
Wider range	Part of the Yolli clear cello bag range. See the Clear Cello Bags sheet for the full 27-size range and bespoke options.

4 Size & Pack Formats

Toffee apple bags are stocked in a single size, supplied in two pack formats. The first dimension is the bag width (the open side); the second is the height.

Size (inches)	Size (mm, W × L)	Pack format	SKU	Bags per pack
5.25" × 8"	133 × 203	Retail pack	RSW015A	50
5.25" × 8"	133 × 203	Bulk box	SW015	4,000

Note: Both pack formats are the identical bag and film — only the pack quantity differs. Bulk box quantity is a nominal pack count. Sizes outside 133 × 203 mm are available through the wider clear cello bag range or as a custom order for trade volumes.

5 Closing & Sealing Options

Method	Detail
Twist ties & ribbon	The usual finish for toffee apples — gather the bag around the stick above the apple and secure with a twist tie, ribbon or satin bow for a neat, giftable presentation.
Heat sealing	Compatible with impulse and continuous band / bar sealers for a secure, tamper-evident finish at volume.
Self-seal strip	An adhesive self-seal strip can be added across the clear cello bag range by request. It must be specified by email before ordering, as it is not applied as standard.

6 Typical Applications

- Toffee apples and chocolate apples
- Caramel and candy-coated apples
- Funfair, market and seaside stalls
- Halloween and bonfire-night treats
- Large lollipops and confectionery
- Wedding favours and party bags

7 Custom & Bespoke Supply

Bag sizes other than 133 × 203 mm are available through the wider Yolli clear cello bag range, or as a bespoke size for trade customers with volume requirements. Custom-printed bags are available on the same food-grade polypropylene film, with logos, ingredients, allergen text and barcodes printed directly onto the bag.

Custom production is subject to minimum order quantities, lead times and confirmation at the time of enquiry.

8 Supporting Compliance Documentation

The following documentation for the food-grade polypropylene film used in these bags is held on file and available to trade customers on request. Supplier-identifying details have been redacted. Together the documents confirm:

- **Manufactured to a food-packaging standard.** The film is produced under the requirements of the BRC/IoP Global Standard for companies manufacturing and supplying food packaging, and is suitable for direct food contact.
- **Compliant with the EU & UK food-contact framework.** Confirmed against Regulation (EC) No 1935/2004 (materials in contact with food), Regulation (EU) No 10/2011 on plastics (inclusive of successive amendments and transition periods), Regulation (EC) No 2023/2006 (good manufacturing practice) and the Materials and Articles in Contact with Food (England) Regulations 2012.
- **Migration testing — pass.** When tested with olive oil and de-ionised water for 10 days at 40 °C, overall migration was within the limits laid down by EU legislation.
- **Packaging waste, heavy metals & BPA.** Compliant with European Directive 94/62/EC; checked annually for heavy metals under the Packaging (Essential Requirements) Regulations 1998 (No. 1165). Certified as not intentionally containing Bisphenol A, with no post-consumer or recycled materials used in the film.

Note: Based on the manufacturer's Statement of Compliance for the polypropylene film (dated January 2024) held on file; Yolli additionally holds BRCGS Agents & Brokers certification and provides VAT invoices with all business orders. Supplier names, lot numbers and certificate / test-report reference numbers have been redacted. Original certificates can be issued to trade customers on request — confirm exact references before relying on them for due-diligence files.

9 Warnings

- Plastic bags can present a suffocation hazard. Keep away from babies and children.
- Not suitable for oven, microwave or boil-in-bag use unless separately confirmed for the finished application.
- Store away from direct heat and naked flames.
