<u>9.</u>

This preparation has been manufactured initially using pigments in Powder form. Some of these pigments may have an OES assigned to them purely for dust. As the pigments are fully encapsulated in polymer and the product supplied in either a granular or pellet form we do not believe that a dust problem is likely to exist. Should abrasion occur during transport or processing forming a dust we would expect this to be of a very much larger particle size than the original pigments employed precluding it from becoming respirable dust.

General protective measures:	Observe normal standards of industrial hygiene for handling chemicals.
Hygiene measures:	Wash hands before breaks and after work
Respiratory Protection:	Use respiratory protection in case of insufficient exhaust ventilation or prolonged exposure
Hand protection:	Plastic or insulated gloves.
Eye protection:	Safety glasses or face shield if necessary.
